

# Still Remains, Sleepless Nights Alone

At the end of all the earth  
I find you here alone  
At the forefront of my heart  
And the butterflies  
That tried to bring you life  
Have died and gone away

Oh we are apart and I am lost  
So while she sleeps, she dreams  
We spend another sleepless night alone

You're so flirtatious with loneliness  
And time just lingers on  
We'll never become one  
Forgot me, love  
I've tried to bring you home  
But I've died and gone away

Even if forever never comes  
You're the only one  
Who makes me come undone
