

# Stone Roses, Your Star Will Shine

Your star will shine again one day  
Through deep blue velvet skies  
Shine for all the world to see  
The universe in your eyes  
When the storm outside is raging  
And the dogs they howl your name  
Lay down and sleep , i'll kiss you  
You're star will shine.  
nah, nah, nah, nah, nah, nah, nah, nah  
Hush my darling, don't you cry  
I'll stay by your side until morning  
All through the night I'll watch the skies  
And your distant sun will shine  
Like the gun that's trained  
Right between your Daddy's eyes
