

# Stone Sour, Devil's Fruitcake

Got a pill in a stomach so tight  
Wish I never had a loss that night  
I can live through the wall's remain  
Try to run but they always find me

Got a room with the devil inside  
All the witness keep my secrets high  
Whoopsy daisy I must have wilted 'cos  
Everything's all tilted

I keep a little place in the back of my mind  
I take a little trip and then you come alive  
My (?)  
I find another reason again

Tether ball with my head on a leash  
Keep me down with a shot of disease  
I can live through the wall's remain  
Try to run but they always find me

I'm a scar  
I'm a tag-along toy  
Make you company - I'm still that boy  
Whoopsy daisy I must have wilted 'cos  
Everything's all tilted

I keep a little place in the back of my mind  
I take a little trip and then you come alive  
My (?)  
I find another reason again

I keep a little place in the back of my mind  
I take a little trip and then you come alive  
My (?)  
I find another reason again

You don't wanna love me  
You don't wanna love me  
You don't wanna love me anymore  
Bring it all one time

I'm alone and the sky's with a face  
I'm the one with the full-man disgrace  
I can live through the wall's remain  
Try to run but they always find me  
Live my life in a chain-linked fence  
They can taste to prolong suspense  
Whoopsy daisy I must have wilted 'cos  
Everything's all tilted

I keep a little place in the back of my mind  
I take a little trip and then you come alive  
My (?)  
I find another reason again

I keep a little place in the back of my mind  
I take a little trip and then you come alive  
My (?)  
I find another reason again

You don't wanna love me  
You don't wanna hurt me  
You don't wanna love me anymore  
Bring it all one time

Take it away  
Oh, take it away  
Again...
