

Stonewall Jackson, Past Is All The Future I See

When she left me all she left me was lonely
She took everything that mean anything to me
As times go by times go by for me so slowly but the past is all the future I see
And the more I think of her the more I think of her love
And I believe I make believe she still loves me
For each day I find each day that she's still on my mind
And the past is all the future I see
[steel]
The stars I see I can see don't shine so brightly
If there's sunshine it never shines for me
And blue skies only leave me blue and lonely and the past is all the future I see
And the past is all the future I see
And the more I think...
Yes the past is all the future I see
