## Stratovarius, In My Line of Work

You deserve everything Everything that you need And all that you long for

But I, I'm rarely around Every train feels outbound I wish I could give you so much more

I must roam
Follow the road I've chosen
Leave our home
The land is dark and frozen
Night by night
You're still in my mind
Everything I must do
Is your burden too

Still the road goes on and on We just have to play along Days are lonely, nights long In my line of work

This is how the story goes Highest highs and lowest lows Home is never too close In my line of work

Here the rules don't apply Another town passes by New faces, new strangers

And you could use someone new Someone better than me But I still hope you will be waiting

I must roam
Follow the road I've chosen
Leave our home
The land is dark and frozen
Night by night
You're still in my mind
Everything I must do
Is your burden too

Still the road goes on and on We just have to play along Days are lonely, nights long In my line of work

This is how the story goes Highest highs and lowest lows Home is never too close In my line of work
