

Stroke 9, You Lead The Way

Well she says she's got it figured it out
She thinks it's getting better
I don't believe this and I'm never gonna let her
Well she says she's strong
I say she's crazy
She says I'm wrong
And I say well maybe
When she's lying on the floor
And she can't take no more
She knows the word to this one
You lead the way
Away from here
Well there's a conversation
That's never gonna happen
It's about a relationship
And we're sitting here laughing
She thinks she's strong
Well I think she's crazy
She thinks I'm wrong
And I say well maybe
When she's lying on the floor
And she can't take no more
She knows the word to this one
I sympathize with what she's in
It's face the music time again
She looks to me to sing along
