## Subhumans, Parasites

The government are real good to us They crowd in their shelters and let us die The nuclear holocaust won't last long White turns to black in the sky

(Chorus) You build your demolition war What the hell are you fighting for?

You keep your peace with the starving countries The Cambodians have to be fed But can't you see we've got our problems? You're taxing us to buy tons of lead

## (Chorus)

Labour can take the businesses over Because they've got the worker's rights A choice of three for democracy And they're all parasites

## (Chorus)

Parasites - taking over the country! Parasites - taking over your home! Parasites - taking over your mind!
