

Submersed, Finding You

Take a step outside the boundaries we live in
Get to know yourself, the real you, the real me
Join the hands of faith, that hold you, that know you
Let the love go free, that's in us, that's in me
It's in me

See it all
Find yourself inside this world
Live for all
Remember all that you stand for

Open the eyes of all, who see you, who see me
Never lose sight of all you stand for, you live for
Let go of the pain that holds you, that binds you
Break free of it all around you, around me
Yeah, around me

See it all

Find yourself inside this world
Live for all
Remember all that you stand for

Find yourself inside this world
Live for all
Find yourself inside this world
Live for all

See it all
Find yourself inside this world
Live for all
Remember all that you stand for

See it all
Find yourself inside this world
Live for all
Remember all that you stand for
