

Suede, Streetlife

Street life into the night with the syncopated melodies
Street life look left look right you've got lips from a magazine
Cheap sound that comes from underground communicates to everyone
Street life it's alright you get your tips from a popular song

It's the beat of the concrete street that you'll love for a million years
It's the sound that comes from underground that's got you clapping
got you shaking your rears

Street life
Street life step to the mike with your sexual equality
Street life look left look right you've got lips from a magazine
Cheap sound that comes from underground is like a bass drum kicking along
Street life sweet life cheap life it's the street life going on and on

To the beat of the concrete street you can live for a million years
The dumb sound that comes from underground that's got you clapping
got you shaking your rears
Street life

It's all you know
It's all you see
It's all you follow
It's all you believe

Move your feet to the concrete beat and you can live for a million years
To the sound that comes from underground, clap your hands
get shaking your rears
Street life
