

# Sugar, Man On The Moon

It's the man on the moon  
Saying goodnight to you  
Oh how it shines  
He's a good friend of mine  
He's a good friend of yours  
Even many miles away

I hope he comes soon  
It's the man on the moon

In a night of despair  
Only one light is there  
It's the man on the moon  
Saying goodnight to you  
If you're holding my hand  
As the earth turns to sand

I see your face  
I see that look on your face  
Don't you know that  
Space is the place

If you look to the sky  
Look him straight in the eye  
And as strange as it seems  
If you wish all your dreams  
Will come true after all
