## Sugar Ray, Blues From A Gun

I want to watch the world cry I couldn't open my eyes I almost spoke but can't speak Still being shelled all those lies

Blues from a gun I'm not the only one I've been fooled They got me on the run I've tried hard Everything's been done I've been fooled from blues from a gun

I start to watch the world crumble I had to open my eyes I start to run but I stumble They stole the blue from the sky

Blues from a gun I'm not the only one I've been fooled They got me on the run I've tried hard Everything's been done I've been fooled from blues from a gun

Tears today in a way Fears today won't go away

Blues from a gun I'm not the only one I've been fooled They got me on the run I've tried hard Everything's been done I've been fooled from blues from a gun

Whenever I turn around I'm lost and I can't be found Whenever I turn around I'm lost and I can't be found

All these graces flying in the air now Look at it fall, look at it fall All these graces flying in the air now Look at it fall Look at it fall Look at it fall
