

# Sugar Ray, Invisible

your not alone, there's no one by  
you got a reason for it  
you took a try, you lost control  
I got a feeling that it's coming ??  
I can see you, looking right through you, can you hear me  
no time for you, starring right through me, can you see me  
your on your own, there's no disguise  
you feel it coming to it  
there's no one by, you're feeling old  
just want you feeling like the first time that I saw you  
I can see you, looking right through me, can you hear me  
no time for you, starring right though me, can you see me  
you're all alone, as time goes by  
must be a meaning to it  
I never try, I'd rather sleep  
but watch your head as I watch ????  
I can see you, looking right through me, can you hear me  
no time for you, starring right through you, can you see me
