

# Sugarcult, Champagne

All I can taste is champagne  
When it hits the brain like cocaine  
Spinning around and round  
I cant get up without your help  
I've fallen down

All I can taste is champagne  
Another day down the drain  
Sleeping around and round  
We cant make up without your help  
It's over now

(Chorus)  
You want it  
You need it  
You cant explain  
You fight it  
You feed it  
You can and I can live without you  
Oh moving on without you oh

Love is like Novocaine  
And it leaves a little stain  
The beauty in all this pain is  
I cant get away from you  
So pull me down  
And don't make a sound

(CHORUS)

All I can taste is champagne  
Dancing away down my veins  
Spinning around and round  
I cant get up without you help  
I'm on the ground

Somebody help me  
I'm losing everything when I'm without you  
Ohh doing it without you ohh

All I can taste is champagne  
Another day down the drain  
All I can taste is champagne  
All I can taste is champagne
