

Sunny Side Up, Everything You Do

(D. Dickers)

Girl, I'll be true

it took me some time to get to you

the spell you put on me

was leaving me unaware

of all the things that you are

I never thought you would stick with me

through every high and every low

but truth can be stranger than fantasy

and baby, this I want you to know

chorus A

Everything you do

seems like a trip to me, the chemistry

Everything you say

is like a blessing to my ears

The look of your smile

left me unconscious for a while

but when, my hopes were high

I became mesmerized, paralyzed by love

I was lookin' for common ground

and a way to ease my soul

now sweet talkin' lovin' is what I found

and you are takin' control

chorus B

Everything you do

seems like a trip to me, the chemistry

Everything you say

is like a blessing to my ears

Everything you do

is turnin' my life around, upside down

Everything I want

is to have you by my side

Everything you do now

it took me some time to get to you

Everything you do babe

is turnin' my life around, upside down

I never thought you would stick with me

through every high and every low

but truth can be stranger than fantasy

and this I want you to know

repeat chorus B
