

# Superchic(k), Help Me Out God (Dropped Chevy

Help me out God  
I need a little something  
Turn the brights on  
I can't see where we're going cause I don't know  
when things'll work out just fine  
Or if this road we're on leads us up  
Or is leading me on down to my wishing well  
Where I might drown  
Oh I might drown  
Cause I can't swim without you God  
Help me out God  
I need a little something  
Hold my hand  
So I know that I'm not falling down or spinning around  
Or am I really just fine is this the vertigo I fell  
Just simply fear or maybe real it's a long way down  
And I might fall and I might fall cause  
I can't stand without you God  
Help me out God  
I need a little something  
Just enough so I don't lose hope  
Before morning comes cause in the sun things'll work out just fine  
but this night's been extra long I fear I won't make it to the dawn  
Cause the night is dark and I might doubt and I might doubt cause  
I can't hope without you God  
Just enough for today get me through til tomorrow
