

Superchick, Help Me Out God (Dropped Chevy M

Help me out God
I need a little something
Turn the brights on
Cause I can't see where we're going to
And I don't know when things'll work out just fine
Or if this road we're on leads us up
Or is leading me on down to my wishing well
Where I might drown
Oh I might drown
Cause I can't swim without you God
I can't swim without you God
I can't swim without you God

Help me out God
I need a little something
Hold my hand so I know that I'm not falling down
Or spinning round or am I really just fine
Is this vertigo I feel just simply fear or maybe real
It's a long way down
And I might fall
And I might fall
Cause I can't stand without you God
I can't stand without you God
I can't stand without you God
I can't stand without you God
I can't stand without you God

Help me out God
I need a little something
Just enough so I don't lose hope before morning comes
Cause in the sun things'll work out just fine
But this nights been extra long I fear
I won't make it to the dawn
Cause the night is dark
And I might doubt
And I might doubt
Cause I can't hope without you God
I can't hope without you God
I can't hope without you God
I can't hope without you God
I can't hope without you God

Just enough for today to get me through til tomorrow
Just enough for today to get me through til tomorrow
Just enough for today
Just enough for today

Cause I can't hope without you God
I can't hope without you God
I can't hope without you God
I can't hope without you God
Cause I can't hope without you God
