

# Superior, Think

I present your new life  
Polished blank and clean  
Now you can forget the one you've been

Be the first example  
For perfect surgery  
The brain-controlled messiah that we need

No more rusty dreams inside  
Your stainless world  
The mind-remote-control is your best friend

Switching off emotions  
You're acting pretty cool  
Powered by the calm-reaction-tool

24-Bit Love-protection  
Coolness guaranteed  
Shyness is the least that you will need

Television useless  
Guess what you will get!  
Now you can receive the pictures

Inside your head

Thoughtomatic  
Silicon magic  
Download your dreams to the fool-check-link

Brain-Dump arises  
Scanning your crises  
Are you able to think?

Nightmare turns to lightmare  
Sleepless nights are gone  
Nothing will disturb you having fun

Contact to your best friends?  
No problem anymore  
That's what the phone device is for

Solar plates deliver  
All the energy you need  
Just a little chip you have to feed

Scientists are working on  
The only bug it's got  
They've got to keep you cold inside 'cause  
This chip gets hot!
