Supertramp, Downstream

Took a boat Sunday, down by the sea It just felt so nice, you and me We didn't have a problem or a care And all around was silence, everywhere

You are the reason I was born Be with you through all seasons I'll always hear you when you call We'll keep the love light shining Through each night and day A lonely life behind me Oh what a change you've made

So down here on the ocean we will stay Went through a lot of changes Turned a lot of pages When I took a boat Sunday

To know you as I know you now That is all I need And we will get along somehow If we both believe

So down here on the ocean we will stay Went through a lot of changes Turned a lot of pages When I took a boat Sunday
