Sweet, Dream On

Your head lies on your pillow Do you dream of me tonight I'm waiting for the sunshine To bring the morning light To kiss your cheek and wake you from your sleep would not be right So gentle like a baby I'll keep you warm tonight Let the moonlight cast the shadows Of our love forever more Dawn will break and take them away Like it always has before But you are here I know it's real If I reach out my hand and touch you So I'll leave you softly dreaming That I'm making love to you Dream on you little girl Dream on you little girl Dream on you little girl
