

Sweet, It's Lonely Out There

(Ralph Siegel/Fred Jay)

You took a walk, left me high and dry
you disappeared, never said goodbye
we had a love that was meant to last
How could our love slip away so fast
Here goes a fool that can't live without you

It's lonely out there
Away from you
It's lonely out there
Since we've been through
Lonely, just like thunderous spaces
Lonely, without your sweet embraces
Lonely out there
Lonely

When did it end
When did it start
When did I know
I'd lost your heart

You took a walk, left me high and dry
You disappeared, never said goodbye
We had a love that was meant to last
How could our love slip away so fast
Here goes a fool that can't live without you

It's lonely out there
Away from you
It's lonely out there
Since we've been through
Lonely, just like thunderous spaces
Lonely without your sweet embraces
Lonely out there
Lonely

Lonely out there
Away from you
It's lonely out there
Since we've been through
