

# Swingin' Utters, Twenty-Three

Was it something you said or was it something you did it doesn't matter much 'cuz I can't leave either  
Well I've been gone now far too long that's why I'm writing you this song it's been six months to date  
I just wanna' hear you voice on the phone  
I just wanna' hear you voice on the phone

I drink so I can retain some form of confidence but it never really kills the pain it never did I've gotta

Well, I always used to feel so left out but now my life's all turned around its been nine months to date  
I just wanna' hear you voice on the phone  
I just wanna' hear you voice on the phone

For the first time, I hope the last to the future, who cares about the past I fell in love now and it's nice  
Twenty-Three  
I've been gone now far too long that's why I'm writing you this love song well, its been one year to date
