

# Sworn Enemy, Absorb The Lies

You think you're bulletproof, deception is your guise  
False prophet sent to lead the working class demise  
We the people stand to lose our blue skies turn grey  
Figurehead of a fallen nation time of eternal dismay

We face our toughest battles with a foreign foe  
Cells unlike any other you'd ever know

Invaded lands now they won't go  
For years and years our soil unknown  
Hide your children behind their closed doors  
Now watch your 1st borns go fight the war...

Poverty is not a crime  
The poor the weak all suffer in time  
The first to go stand the frontline  
Constantly walking a fine line

Absorb the lies we face deceit  
a countries politics based on greed  
A better place so we've been told  
300 years to soon to be bold

The thought of this makes me sick  
to see a country so great  
Living in the dark ages  
the truth will makes us hate

Invaded lands now they won't go  
For years and years our soil unknown  
Hide your children behind their closed doors  
Now watch your 1st borns go fight the war...

United they won't break us  
United won't be broken  
United won't break us  
United won't be broken

You want war... We'll bring you war!!!!
