

Sydney Forest, I'm Gonna Fly

One day, the whole world looks like an open page
and you've been dancing as fast as you can with a smile on your face
and then the earth and the sky they all fit together
and carry me away as light as a feather
chase the clouds from the ground
in the big blue sky dont wanna watch it all blow by

so im gonna fly
higher then i ever could
feel the wind blow through my hair
feel the sun dance with the moon
and my feet cant stay on the ground any longer
with every leap of faith I feel a little stronger
wanna swing from a star in the big blue sky
dont wanna watch it all go by so im gonna fly

and see for myself what it looks like from up there
taste the stardust in my mouth chase the clouds until they disappear

and if i could make just one life better
bring a smile to your face when your under the weather
then i'm feeling like i've finnaly found my home
i'll plant the seeds and watch them grow
so im gonna fly... fly... fly.. fly...
higher than ever ever could
im gonna fly
im gonna fly
higher than i ever
ever could
