

Sylvia Juncosa, Love Crash

I wanna go with you
To a place you never knew existed
I wanna take you down
To a place that's gonna sound real different
And I can understand what kind of man you are
Though I gotta love you at a distance
Cause I can see the signs
That your heart is a lot like mine inside
And it seems, you're free
You made your life what you wanted it to be
And I know you can understand a heart that cries
And I know you can understand the animal inside
And I know you can understand pain, addiction
And I know you can understand a love like mine
