System Shock, Escape

Darkness
In the brightest scheme of them all?
Blackness
That I gaze upon as an infinite wall

Come forth savage fear
And lead us
Burn the ground - tear the sky apart
And reach another world!

No!
The skies turning black like never before
Know!
The stars will shine on forevermore!

In one final breath we'll fade away
In one metal tomb we'll lead the way
One last dream worth dying for...
One final scheme to unite them all...

Escape!!

Sadness
Is the weakest spot in our human form
Vastness
As I pray for the end in our human world

Come forth instinctive drive
And lead us
Metal shine in the arctic night
And reach another world!!

No!
The skies turning black like never before
Know!
The stars will shine on forevermore!

In one final breath we'll fade away
In one metal tomb we'll lead the way
One last dream worth dying for...
One final scheme to unite them all...

Escape!!

Carry on, Fly on
Where all your light will shine
Carry on, fly on
All through the arctic night
