

System Syn, Needle Drugs

she's got a little syringe with her heart in it
she wants to shoot it in my veins
no I won't accept this gift
it comes packaged with her pain
she's got a little syringe with her drugs in it
it's connected to her brain
she thinks the world owes her a gift
because she was born insane

I have news for you
you are not the only child
I have news for you
you are living in denial
have you heard the news
you are not the only child in this world

everyone who's born will suffer
that's the nature of the beast

just remember that everyone must bare their cross
and yes they're out to get you
so nail them up when they let you
because they won't hesitate to do the same
and you can only kill your pain for so long

I have news for you
(that's the nature of the beast)
you are not the only child
I have news for you
(that's the nature of the beast)
you are living in denial
have you heard the news
you are not the only child in this world

she's got a little syringe with a gun in it
it's connected to her head
she thought perhaps that I might care
but this is where my feelings lead
I needed her
like I need a hole in the head
