

Tammy Wynette, Your Love's Been A Long Time

Darling let me spend a moment with you I want both of us to share what's on my mind
There's been a change in you and I'm so happy
For I haven't been this happy all the time
There's been something in your past and now it's dying
It kept you from loving me all this time
I can tell that she don't worry you any longer
And after all these years you're really mine
Cause your love's been a long time coming all the hurt just turned to loving
And I'll take it before it's not too late
It took a long time to work it out now it's here and there's no doubt
Your love's been a long time coming but it's here to stay
It took a long time to work it out...
