

# Tanita Tikaram, I Knew You

I wore a watch today it didn't tell me the time  
I saw your face today I knew you'd see through mine  
Does it help a lot? to see I'm on the spot never understood

But I knew you yea I knew you  
But I knew you yea I knew you

I heard your voice today turn into what is best  
I felt your soft caress turn into something less  
Don't make me sound alive don't make me sound a - hurt  
Don't make me, make - believe

'cause I knew you yea I knew you  
Yes I knew you yea I knew you

It doesn't make me lie doesn't make you wise  
Do not analyse 'cos I'd always cry  
Does it help a lot just to see you through 'cos, I'll never know

But I knew you yea I knew you  
But I knew you yea I knew you  
La la la la la ah la la la la la ah

Nobody would know your name nobody  
Would know your name  
Is anybody know his name ...I knew you
