

Taproot, Stay Away

our friendship was a long long fare half of my life
that you were there
along my side companionship so true
you'd pick me up when I was down
you took my fist without a sound
made me smile with no one else around
now you're gone

well I miss you so much more than words explain
well I hear your name
and I need you farther more than ever, now

a loyal love you gave to me everything
that I needed free
everything I wanted the pedigree
but then you had to go away
I know I'll see you again someday
promise me you'll remember the good old days
while you're gone

memories now haunting me I never took the time
to say I'm sorry darling
for every time I crossed the line
so can you please forgive me
and let me show to you
how I go insane
when I hear your name
remember all the pain that I caused to you
