

Taproot, Transparent

I fuckin' love life

I see transparency through me
I see just how I used to be
Now I know

(Spent) spent so much time alone
(Reflect) reflecting upon negatives
(Con) contradicting concentration
On the way I've lived

It's time to take my head off
And put it up on a shelf
What have I done to myself
I guess I fucking love life

I see transparency through me
I see just how I used to be
Now I know

(If) everything around
(Me) represents how I
(Come) of what good will this worry
Do for me

It's time to take my head off
And put it up on a shelf
What have I done to myself
I guess I fucking love life

I see transparency through me
I see just how I used to be
Now I know
I know it

I
I'm just fine
I'm just fine now
No, no, no, no, no, no, no
I'm just fine now

I see transparency through me
I see just how I used to be
Now I know
I know

I see transparency through me
I see just how I used to be
Now I know
I know it
I know
