Taproot, Wherever I Stand

If only I could show you
Just how much I really care
Everyday I'm torn apart
Not knowing if you're even there

Yet again You're a testimony Now and then That a greatness occasionally can come along

Wherever I stand You're the one Who'll be right there with me Wherever I land You're the one Who'll be there to break my fall

Whether fast or slow If only I could know you So every way I feel A part of something like you always do

Yet again You're my sanctuary How and when That a greatness eternally does come along

Wherever I stand You're the one Who'll be right there with me Wherever I land You're the one Who'll be there to break my fall

Wherever I stand,
Wherever I stand
You'll be right there with me
Wherever I land
You're the one
Who'll be there to break my fall

No matter where No matter how I know that you'll be There by my side It feels so right

The sting you share
The fact I'm found
I know more about
What lies inside us gives me life

Wherever I stand You're the one Who'll be right there with me Wherever I land You're the one Who'll be there to break my fall

Wherever I stand,
Wherever I stand
You'll be right there with me
Wherever I land
You're the one
