

Tarot, Before The Skies Come Down

The ropes want to feel your neck
To embrace is good for dirt and wood
Growing shadows with every light you stepped into
They're coming for you
Smothering the sun
Life is done

Before the skies come down
You try to live and see
Before the skies come down
You try some more than me

The stars have led me astray
Beneath my feet the Earth just moved away
Who changed the world, unhinged the time?
Orbits in decay, crushed by the black sun
Life was done

Before the skies come down
You try to live and see
Before the skies come down
You try some more than me
Before the skies come down
You try to live and see
Before the skies come down
You try some more than me
The skies come down

Whoa!
The skies are coming down

Before the skies come down
You try to live and see
Before the skies come down
You try some more than me

(Before)
Before the skies come down
(Before)
Before the skies come down
(Before)
Before the skies come down
(Before)
Before the skies come down
