

# Taxiride, Let Me Die Young

I believe  
In the faithful and true  
And I believe in silly things  
Like everlasting love  
But I could never ever believe  
What was struck upon you  
You fell away  
But this time it was for good?

Let me die young, let me die young  
So I can be with you forever  
Let me die young, let me die young  
So we can laugh again in heaven

Once again  
You broke my heart (you once again with me)  
Other days the pieces fell together again  
But this time it's different  
Cause today my heart is beyond repair  
So it bleeds  
Cause darling, you slipped away  
Much too easy for me?

Let me die young, let me die young  
So I can be with you forever  
Let me die young, let me die young  
So we can laugh again in heaven

When the loneliness inside me  
Turns to pain  
I'll drink my heart to sleep  
Just to see you once again

I believe  
In the faithful and true  
And I believe in silly things  
Like everlasting love

Let me die young, let me die young  
So I can be with you forever, oh?  
Let me die young  
I'm on my way

Let me die young, let me die young  
So I can be with you, I wanna be with you, oh?  
Die young, let me die young  
I'm on my way  
I could die  
I could die
