

Taylor Hicks, Gonna Move

When I was a little boy, I felt so alone
Quiet country house that I had to call home
Living with a couple of folks, rich millionaires
Sat on their money; Lord, it seems they didn't care

Finally we moved to our own place
where I could walk around with a smile on my face,
and I knew in order to be a man
I had to pull up my roots and move on in this land

I'm gonna move away from here
You can find me if you wanna go there
I'm gonna move away from here
You can find me if you wanna go there

Came to a school in the big city
Looked around at the lights and I thought they were pretty
They told me and teached me to live by their rules
So I wouldn't be nobody's fool

I found out, not too long
Their rules wouldn't let me sing my song
I knew in order to be a man
I had to pull up my roots once again and move on in this land

I'm gonna move away from here
You can find me if you wanna go there
I'm gonna move away from here
You can find me if you wanna go there

I'm gonna move away from here
You can find me if you wanna go there
I'm gonna move away from here
You can find me if you wanna go there

Then I joined the college ranks
There they said they'd teach me how to think
They gave me books to read and papers to write
They didn't know about this boy's coming fight

But I found out after awhile
reading those books was making me lose my smile
I knew in order to not conceal
I had to play music and express what I feel

I'm gonna move away from here
You can find me if you wanna go there
I'm gonna move away from here
You can find me if you wanna go there

I'm gonna move away from here
You can find me if you wanna go there
I'm gonna move away from here
You can find me if you wanna go there
