

Teflon Sega, I Think Of You

i think of you
every papercut every heartshaped bruise
i remember us
i think of you
every time i see the world burning on the news
i remember us
i think of you
when my laces in a knot
dirt on my shoes new depression just dropped
its you
everything baaaad taste like you you

midnight and looking for a flight
fast life living with the queen of gaslight
slivers under fingers was the vibe
stevie wonder why i didnt see it on the first night
i cant even smoke since you and i
a perfectly wonderful way to ruin every high
i gotta get away from here tonight
driving until i cant see you in my taillights
got no options
only toxins
giftwrapped with that yellow caution
lost inside your
empty conscience
vanta black-hole

i think of you
every papercut every heartshaped bruise
i remember us
i think of you
every time i see the world burning on the news
i remember us
i think of you
when my laces in a knot
dirt on my shoes new depression just dropped
its you
everything baaaad taste like you you

liquor when im looking for a fire
thought that it was love it was marks from your tires
running over me to get you higher
laying in your arms like a hug from barbwire
never lied about being a liar
showed your true colors and i flirted w denial
picture perfects always been your style
photoshopped when all i needed was a crooked smile

got no options
only toxins
giftwrapped with that yellow caution
lost inside your
empty conscience
vanta black-hole

i think of you
every papercut every heartshaped bruise
i remember us
i think of you
every time i see the world burning on the news
i remember us
i think of you
when my laces in a knot
dirt on my shoes new depression just dropped

its you
everything baaaad taste like you you
