## Templo Diez, Song VI

Is it so that the morning rain Has just soaked you down, and left you insane

There'll be more days to learn to get through Today is spring, the air is so blue Wind on your skin, makes you feel new, Today is spring, the air is so blue Just catch it while you can

Is it so that the girl who came Here yesterday won't see you again I bet she laughed when you burst in tears, See, noone knows you more than I did

There'll be more years to learn to get through Today is spring, the air is so blue Sun on your skin, makes you feel new, Today is spring, the air is so blue Just catch it while you can

Is it so that noone around Heard you when the blade ran into your arm There's just 1 life to learn to get through, Today is Spring, the air is so blue Let's talk and drink, get out of your room Today is Spring, the air is so new

Just catch it while you can Just catch it while you can Just catch it while you can
