

# Ten Foot Pole, Fall In Line

shine your boots  
so you can march across the desert  
lift your knees look sharp as a knife  
you'll learn to  
like it  
you'll be all that you can be  
no one can stop our way of life

(Chorus)  
fall in line  
no back talk do what we told you  
step in time  
learn to show your pride

turn the wrench  
build more trucks than your neighbor  
only work gives the  
right to live  
feeling righteous  
defending god's own country  
and wish you had more lives to give

(Chorus)

the empire calls  
for you to make a sacrifice and fall in line

rows and rows of cars  
rows and rows of credit card loans  
rows and rows of bars  
rows and rows of bones
