

# Ten Foot Pole, Toss It All

I took this job cuz it was my dream  
and I work hard for it  
You congratulated me for not settling for a lesser life  
And you followed dreams of your own and I love you  
for it  
But now success is bittersweet, it swept you up, and  
took you far away  
Now we simply take it day by day  
But days without you go slow  
And someday in a week or nine  
Our paths will cross and for a time  
You'll hold me like you'll never let me go  
By day it's clear my mission's here  
Three thousand miles feels like a few  
At night alone I hold the phone  
I'd toss it all to be with you  
My friends laugh when we're out sometimes  
A girl gets aggressive  
She'll rub my leg I'll hit the street  
She can't compete cuz no one can touch you  
Now I'm spoiled by all the things you do  
I'm ruined and it shows  
And someday...  
In my mind, there will be a time when we can stay  
together like I know we're meant to  
It's all right  
I keep telling myself if I wait then someday we'll be  
close if I hold on  
The thought of us together makes me strong  
I'm stronger than you know
