

# Tendency To Talk, Albums.

Its a blackened sky  
upstyle down finding  
icky mettle to free all angels  
in casino out means  
so long astoria  
americana will let go of discovery

a mark, a mission, a brand, a scar

hot fuss  
and spit  
the fake sound of progress means say it like you mean it  
when you start static

futures of where you want to be  
because we're casually dressed and deep in conversation but the anthem will never stop the capta  
when clarity says lets talk about feelings  
come clean

the fat of the land  
means very emergency  
united by fate is astray in neon ballrooms  
so cheer up  
we're coming far from nowhere  
its the final straw of the lost superunknown

the soundtrack for a generation  
is just what it is to burn  
twisted by design  
yeah
