Terminal Choice, Collective Suicide (club Mix)

there's no place in this fucking world no place for a fragile heart like mine I can't hide my insecurity when madness comes around

(Chorus)

I will wake you up at night prepare for collective suicide
I can take you to the moon salvation will come soon and I am not afraid to die as long as there will be you and I will wake you up at night prepare for collective suicide

you always try to force me
in the wrong direction
tell me how can you be sure
as long as I feel insecure

(Chorus)

(Chorus)
