

Terra Naomi, Wait

The sun shines in california
Many days a year
Peaks its sunny head out in the morning
And by evening disappears
It doesn't wait forever
And you won't wait forever

And birds sing in california
Many days a year
The sun goes down the moon comes out
And then they disappear
And they don't wait forever
And you won't wait forever

And i'm here in california
You are far from me
I'm holding out for something
That might never come to be
I'll try to wait forever
But i can't wait for never
