## Testament, Low

Fuel the fire for war it's man against mankind bruises that they bear been beaten down with time

Innocent people suffer the loss your broken hope so close to the cross sometimes you just don't know how low... how low you can, go... So low it's sickening low... low... show some mercy

Hey you piece of shit just leave the kids alone why can't you bear the things that we endure

Innocent people suffer the loss lost hope with faith to the cross sometimes you just don't know how low... how low you can go show some sympathy low.. low... show some mercy

I don't like you for your warped demented ways I hope they lock you down so you never get away low... low... show some sympathy low... low... show some mercy...
