

That Was Something, Here Comes Treble

Well I foot the bill into your position just to make sure that you've got to listen
So I can show you, show you, just what your missing...
So heres one to the problems that I face and another drag for lonely days
and one more shot at making history
But you know me, a boy with wit and common sense
Who plans to be everything you've ever wanted
So wait and see...
I feel the sense of urgency
And I calmly say I know this is exactly what I need
Well I am a narcissist and I have got big plans for this
But I need accomplices or I wont be into it
I keep my influence inside this broken fifth
I speak in present tense but you've always known this
