

That Was Something, Your Song

So pass the torch
This is not a test
And as of now
It doesn't get much better than this
Believe me when I said
I would be brave
If you promised
That nothing's ever gonna change
And you know
We'll take the long way home
And when we get there
I'll be with you all alone
We'll ditch these night
Just to lay in bed
I could promise forever
But my actions would be better than that
So, lets take this slow
We got forever babe
On my own
I'll make this right
What you don't know
Is that tonight
We can be the ones who dream this bright
We set the stage for a gorgeous night
To the tune of a thousand starry eyes
It's so easy to be alone
With the blues and the hazels
And the open road
And you know
We'll take the long way home
And when we get there
I'll be with you all alone
We'll ditch these night
Just to lay in bed
I could promise forever
But my actions would be better than that
So, lets take this slow
We got forever babe
On my own
I'll make this right
What you don't know
Is that tonight
We can be the ones who dream this bright
You know
We got forever babe
[x8]
So, lets take this slow
We got forever babe
On my own
I'll make this right
What you don't know
Is that tonight
We can be the ones who dream this bright
[x2]
