

The Alarm, Let The River Run Its Course

The future deserted waiting there for you and me
No past is going to stop us blowing down this road a piece
Why wee come too far, too far to turn back now
We can just throw it all away when something good goes wrong, oh no
Nothing has been written which says which way we have to go
I not looking for commitment written in stone
No everlasting promise no no

Let the river
Let the river run
Let the water
Let the water fall
Flow down off the mountain
Into the sea
Let the river run, run its course

Wee stood this ground too long there miles to make up
Oh it way past the time we found out if wee truly good enough
There no truth like the truth you dare to let yourself see
Better face it now there is nothing to fear
Everything to gain right in here

Let the river
Let the river run
Let the water
Let the water fall
Flow down off the mountain
Into the sea
Let the river run
Let the river run
Run its course

Let the river
Let the river run
Let the water
Let the water fall
Flow down off the mountain
Into the sea
Let the river run

Let the river run
Let the water fall

Let the river run
Let the water fall
