

# The All-American Rejects, Kids In the Street

In the night  
In the beat, city light  
We'd steal ourselves away and hold on tight  
You were there  
Yeah we were all there  
Too young, too smart, too much for this one town  
We'd get so high we got lost coming down

When we were kids in the street  
Kids in the street  
When we were kids in the street  
Just kids in the street

Remember when we used to laugh, we used to cry  
Live and die by the 45  
Take me back, I'll go there  
Who could stop us, and who would care?  
Always keep to the kids in the street

We were dreams  
We were American graffiti scenes  
No war, no peace, no hope, no means, just us  
And the songs  
With the words we'd sing wrong  
We'd drive until that jealous sun fell down  
Just to watch ourselves in the moonlight summer sounds

When we were kids in the street  
Kids in the street  
When we were kids in the street  
Just kids in the street

Remember when we used to laugh, we used to cry  
Live and die by the 45  
Take me back, I'll go there  
Who could stop us, and who would care?  
Always keep to the kids in the street

And we never felt so alive  
And we'd dance all night under the sky  
We'd live, we'd breathe, we'd die  
When the world stood still for you and I  
Just you and I

Candles burn  
'Cause the world will always turn  
I'll burn both ends until my fire's out  
Lost in the darkness I can still scream out

We used to laugh, we used to cry  
Say goodbye to I-35  
Take me back, down a dirty road  
Where it went we didn't care to know  
A glory night is a story saved  
Mark the chapter but turn the page  
Always keep to the kids in the street

When we were kids in the street  
Just kids in the street
