

# The Arcade Fire, The Woodland National Anthem

I guess we'll have to move  
The neighborhood is on to us  
Let's join the little babe's  
throwin' rocks in front of us  
Riding on my bicycle  
I pass my sister on a bus  
Let's take the country road before our parents send for us  
Trees keep fallin' at my feet  
I guess it's time to build a boat  
Make a raft of our bodies  
Do you think that it'll float?  
What I said was not a joke,  
But you just licked the envelope  
I'm tired of dating, let's elope  
But you just licked the envelope  
Three cheers for my parents,  
Lonely failed experiments!  
Three cheers for my parents,  
Lonely failed experiments!  
Don't you dare blame my parents  
I'm the only failed experiment  
Don't you dare blame your parents  
You're the only failed experiment  
Don't you dare blame your grandparents  
Mom's the only failed experiment  
Don't you dare blame your grandparents  
Dad's the only failed experiment  
Don't blame God  
Just blame God
