

# The Ark, I Pathologize

Walk with me slowly  
let in some air  
I know we both have been lonely  
And I wasn't there  
But here's a packet of peanuts here's a pint of beer  
we both run around in circles when there's nothing to fear

And if I ever did you any wrong  
There's a two-headed reason why this can go on  
But it's true that I've been away to long  
So - I pathologize - I pathologize - I pathologize

Don't know much about love or roses  
But I know we got compatible neuroses  
Know there's a way to shed your skin  
But when we don't know where it ends  
How we should dare to begin?

And if I ever did you any wrong  
There's a two-headed reason why this can go on  
But it's true that I've been away to long  
So I pathologize - I pathologize - I pathologize

--Instrumental--

And if I ever did you any wrong  
There's a two-headed reason why this can go on  
But it's true that I've been away to long  
So I pathologize - I pathologize - I pathologize  
If I ever did you any wrong  
There's a two-headed reason why this can go on  
And it's true that I've been away to long  
There's a two two-headed reason why I sing this song  
And if the key's too high for you to sing along then  
I pathologize - I pathologize - I pathologize
