

# The Beach Boys, That Same Song

Well back in time with just a rhythm and rhyme

Gregorian chants were a real big thing

They took that chant and added harmony

It was a different sound

But had the same meaning

I know (I know) I know (I know)

It took us a long while

To go (to go) to go (to go)

And find us a rock style

I know (I know) I know (I know)

That we can take it one more mile

Because

We're singing that same song

We're still singing that same song

We're singing that same song

That same song

That same song

The rock of ages

Built that rockin' sound

'Til more and more people start to come around

They worshipped in church

And built that great big choir

It grew and it grew

Until it spread like fire

I know (I know) I know (I know)

It took us a long while

To go (to go) to go (to go)

And find us a rock style

I know (I know) I know (I know)

That we can take it one more mile

Because

We're singing that same song

We're still singing that same song

We're singing that same song

That same song

That same song

Same song

Oh yeah

Same song

Oh yeah

Same song that same song

Same song

Oh yeah

Same song

Oh yeah

Same song that same song
