

The Bears, Meet Me in the Dark

When the sun comes up
in the nuclear sky
and the life we had
has blown up and died
we will shed no tear,
we will skip no beat
and we will walk right down
the middle of the street

So let the power fail
let there be no doubt
I wanna be with you

When the sun melts down
and the night goes black
we will take down the flag
and never look back
we will break no law,
we will be the law
and go hand in hand
into the face of it all
